Parts List Introduction

This parts catalog lists parts and sub-assemblies provided as spare parts.
When it becomes necessary to replace parts, always use KAWASAKI GENUINE PARTS. Strict inspection assures quality and performance of KAWASAKI GENUINE PARTS.

1. HOW TO ORDER PARTS

When ordering parts be sure to use the catalog for the correct model and year of the vehicle. Include the following items exactly as listed in this catalog on your parts order.

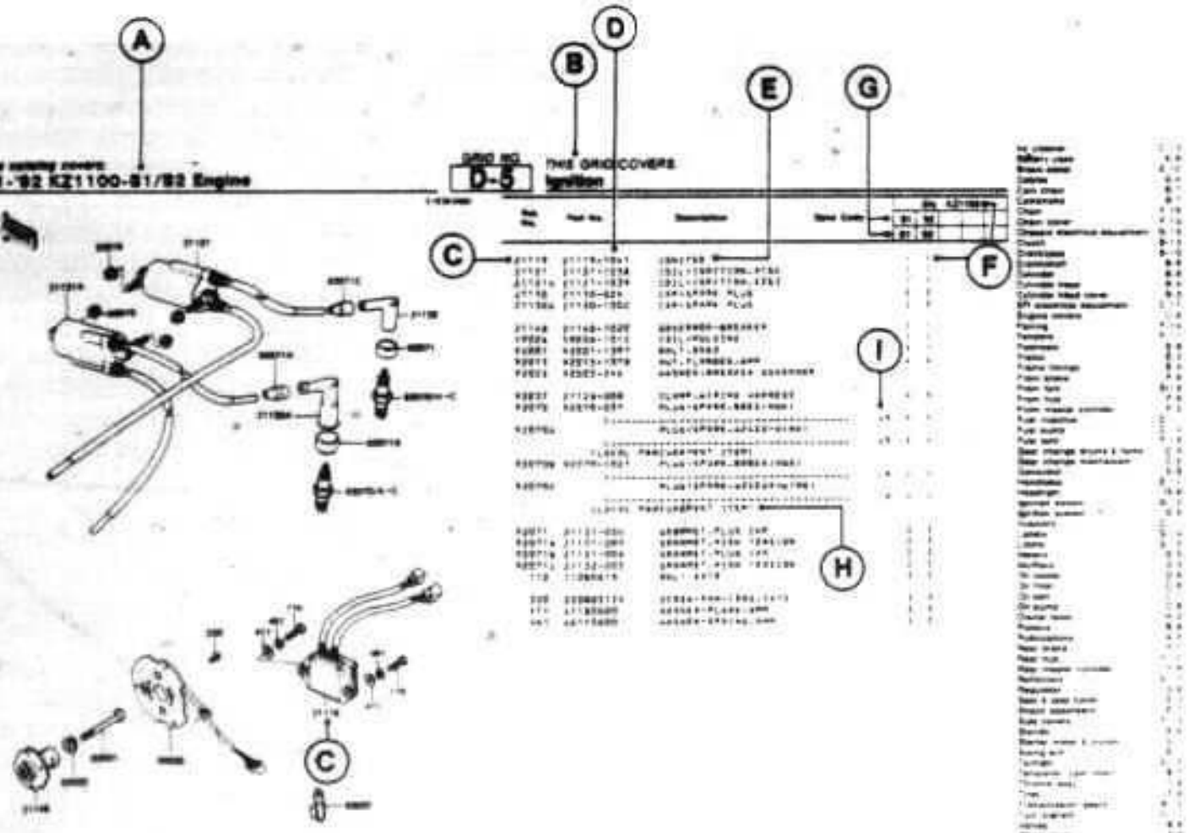

- **Part Number**
- **Part Name**
- **Color Code**

Specify the color using both color code (which is part of the part number) and name when ordering painted parts.

Example: 51001-5074-8G TANK-COMP-FUEL, EBONY

Parts not shown disassembled in the illustrations of this parts catalog are not sold separately; only the complete units or next higher assemblies illustrated, are supplied as spare parts.

EMISSION CONTROL INFORMATION

(United States only)

The Clean Air Act, which is the Federal law covering motor vehicle pollution, contains what is commonly referred to as the Act's "tampering provisions:"

"Section 203 (a) The following acts and the causing thereof are prohibited—

(3) (A) for any person to *remove or render inoperative any devise or element of design* installed on or in a motor vehicle or motor vehicle engine in compliance with regulations under this title prior to its sale and delivery to the ultimate purchaser, or for any manufacturer or dealer knowingly to remove or render inoperative any such device or element of design after such sale and delivery to the ultimate purchaser.

(3) (B) for any person engaged in the business of repairing, servicing, selling, leasing, or trading motor vehicles or motor vehicle engines, or who operates a fleet of motor vehicles knowingly to remove or render inoperative any device or element of design installed on or in a motor vehicle or motor vehicle engine in compliance with regulations under this title following its sale and delivery to the ultimate purchaser."

Note: The phrase "remove or render inoperative any device or element of design" has been generally interpreted by the government as follows:

1. It does not include the *temporary* removal or rendering inoperative of devices or elements of design in order to perform maintenance.
2. It does include:
   a. Maladjustment of vehicle components such that the emission standards are exceeded.
   b. Use of replacement parts which adversely affect the performance or durability of the motorcycle.
   c. Addition of components or accessories that result in the vehicle exceeding the standards.
   d. Permanently removing, disconnecting, or rendering inoperative any component or element of design of the emission control systems.

Regarding these dealer responsibilities as they relate to this parts catalog, you will notice that certain items are identified as "OFF-ROAD USE ONLY" or "RACING USE ONLY." These items do not comply with emissions regulations issued by the United States Environmental Protection Agency and should not be used on any motorcycle which is intended to be used on the public roads.

Also, use only those items which are applicable to the motorcycle in question.

Examples:

1. Do not install oversize rear sprockets identified as "OFF-ROAD USE ONLY" in this parts catalog on dual purpose models which are intended to be used on public roads.
2. Carburetor components (jets, throttle valves, etc.) should only be used on the applicable model(s) noted in this parts catalog.

WE RECOMMEND THAT ALL DEALERS OBSERVE THESE PROVISIONS OF FEDERAL LAW, THE VIOLATION OF WHICH IS PUNISHABLE BY CIVIL PENALTIES NOT EXCEEDING $10,000 PER VIOLATION.

This grid covers:

TAMPERING WITH NOISE CONTROL SYSTEM PROHIBITED:

Federal law prohibits the following acts or the causing thereof: (1) The removal or rendering inoperative by any person other than for purposes of maintenance, repair, or replacement, of any device or element of design incorporated into any new vehicle for the purpose of noise control prior to its sale or delivery to the ultimate purchaser or while it is in use, or (2) the use of the vehicle after such device or element of design has been removed or rendered inoperative by any person.

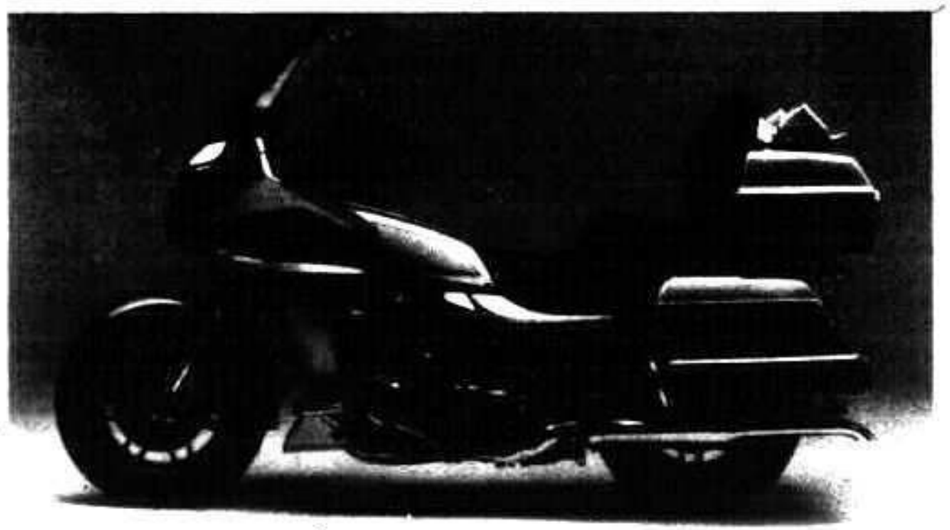

Among those acts presumed to constitute tampering are the acts listed below:

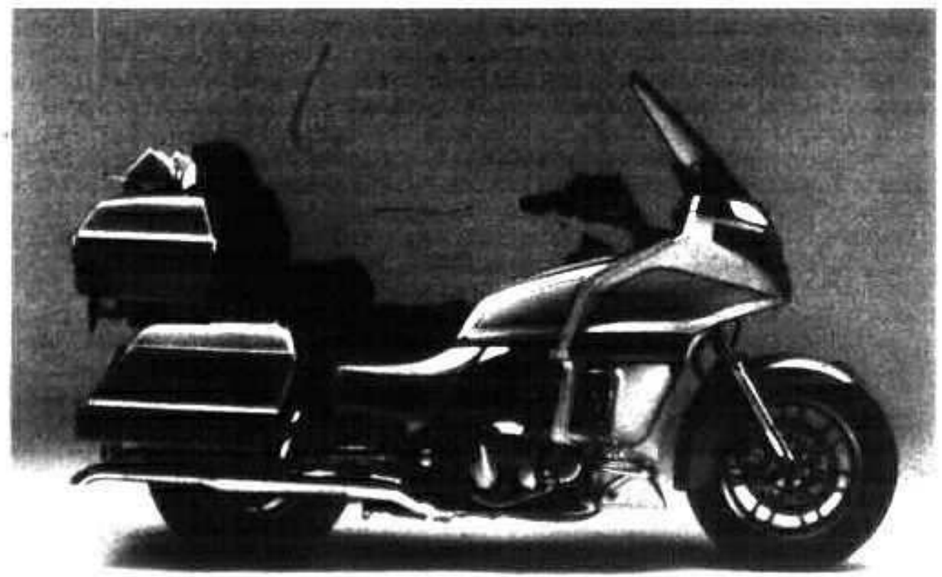

- Replacement of the original exhaust system or muffler with a component not in compliance with Federal regulations.
- Removal of the muffler(s) or any internal portion of the muffler(s).
- Removal of the air box or air box cover.
- Modifications to the muffler(s) or air intake system by cutting, drilling, or other means if such modifications result in increased noise levels.

*Must have howling noise with CB on.

Subject

On some ZG1200-A1 and ZG1200-B1 units, the CB causes a howling noise in the audio system with certain settings and conditions.

Kawasaki Action

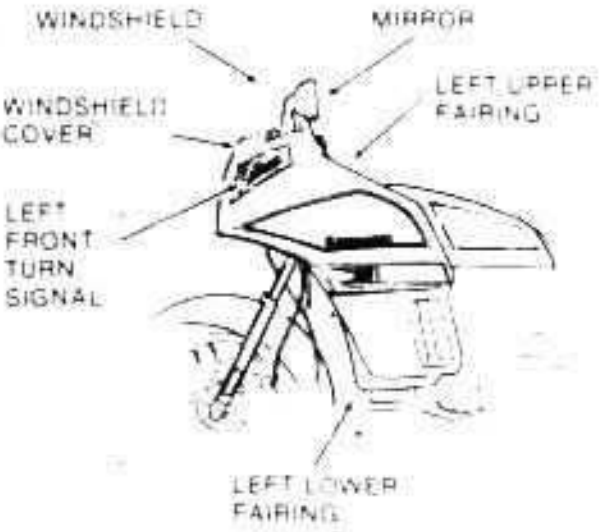

Kawasaki and Clarion have designed a filter to remove the source of the noise and direct it to ground. Kawasaki has initiated a Factory Authorized Repair program to fix eligible units which have the howling noise. All optional CB radios being shipped to dealers now have the filter unit kit described in this bulletin.

Dealer Action

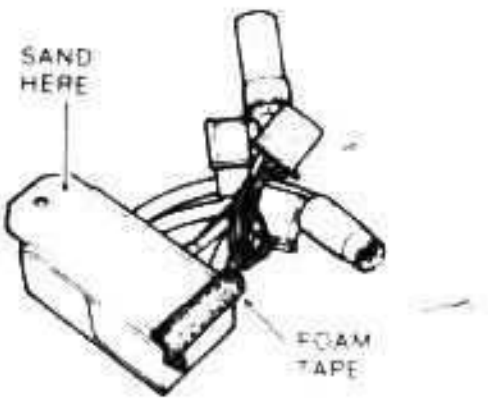

Repair eligible units which have the howling noise by installing the filter unit kit. Follow the Repair Procedure here and in the kit.

Repair Procedure

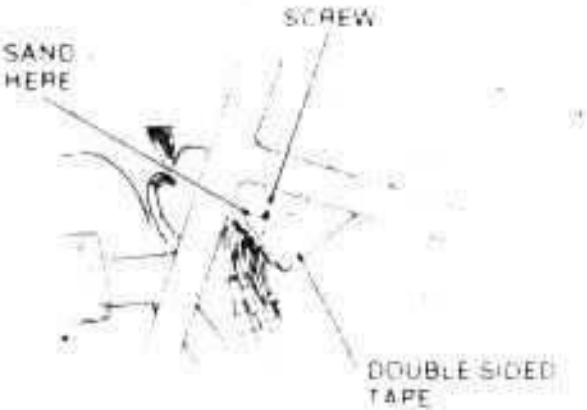

- Remove the following parts.
  - o Both rear view mirrors
  - o Windshield cover
  - o Windshield
  - o Left lower fairing
  - o Left front turn signal
  - o Left upper fairing (let it hang on the speedometer cable)
  - o Top left air duct

- Apply the small piece of foam tape to the filter unit as shown.

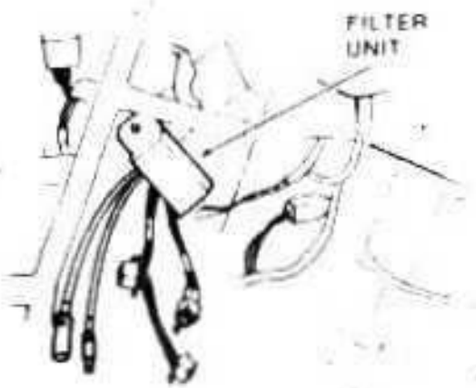

- Remove and discard the screw on the front left corner of the radio box.

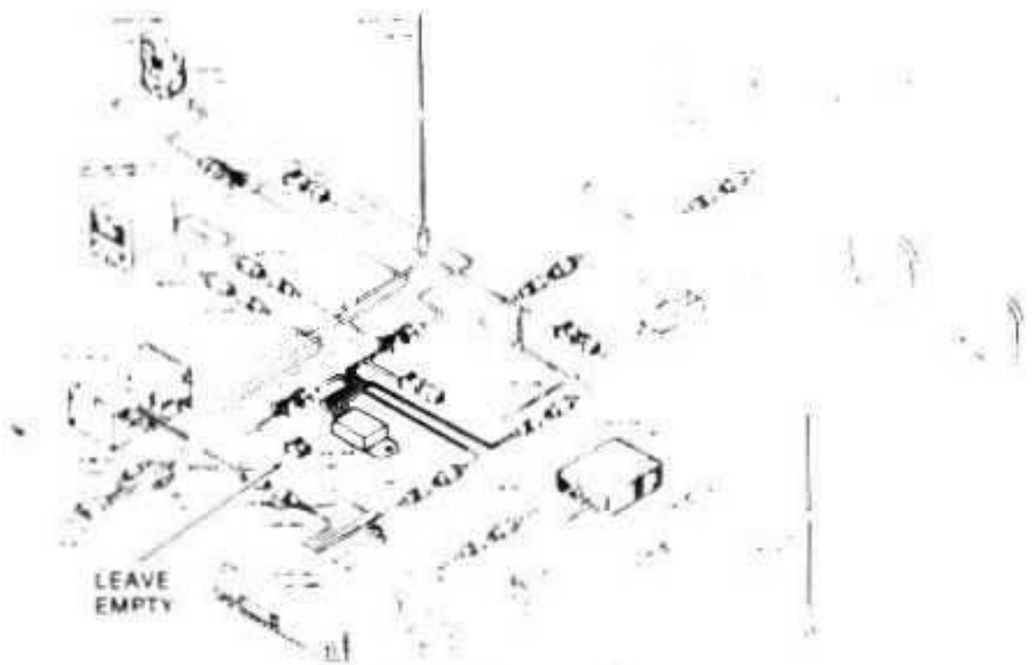

SERVICE

- Use fine sandpaper to thoroughly clean the radio box where the filter will mount and the tab on the filter itself for a good ground
- Apply the double-sided tape to the side of the radio box where the filter unit will mount
- Using a non-permanent locking agent (Loc-Tite Lock 'N Seal, P/N K61079-001 or equivalent), mount the filter unit with the 3 mm by 8 mm screw provided

- Disconnect the DIN plug on the yellow banded lead (from the radio box to the helmet sound connection)
- Connect the male DIN plug from the filter unit to the female DIN plug from the radio box
- Connect the female DIN plug from the filter unit to the male DIN plug from the helmet sound connector
- Disconnect the two nine-pin connectors between the radio box and the wiring harness (these go to the handlebar controls and the rear remote control box)
- Connect the nine-pin male connector from the filter unit to one of the nine-pin female connectors from the radio box. The other is not used
- Connect the longer female nine-pin connector from the filter unit to the shorter male nine-pin connector from the harness
- Connect the shorter female nine-pin connector from the filter unit to the longer male nine-pin connector from the harness
- Install the parts removed at the beginning

RECALL

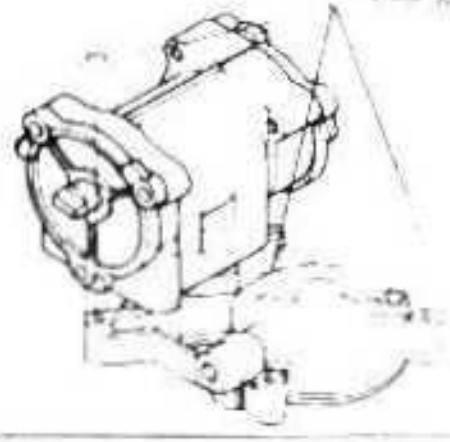

THIS BULLETIN IS OF THE HIGHEST PRIORITY AND MUST BE ACTED UPON IMMEDIATELY TO ENSURE CUSTOMER SAFETY.

Eligible Units

Model	VIN Range
ZG1200-B4/L	JKAZG9B1VLB502501 thru 502783

Subject

On eligible units the lower crankcase half was mismachined positioning the oil filter case incorrectly. As a result the oil pump shaft is not properly aligned with the drive gear shaft or the water pump shaft. This misalignment stresses all three shafts excessively and could cause any one of them to fail. If the oil pump or water pump drives fail the engine could suffer extensive internal damage and stop running due to lack of lubrication or overheating.

Warranty Information

This is a safety recall campaign. Repairs are authorized regardless of ownership or warranty status. Repairs MUST BE PERFORMED IMMEDIATELY ON ALL ELIGIBLE UNITS in the field and during initial assembly and preparation. See the Warranty Policies and Procedures Manual

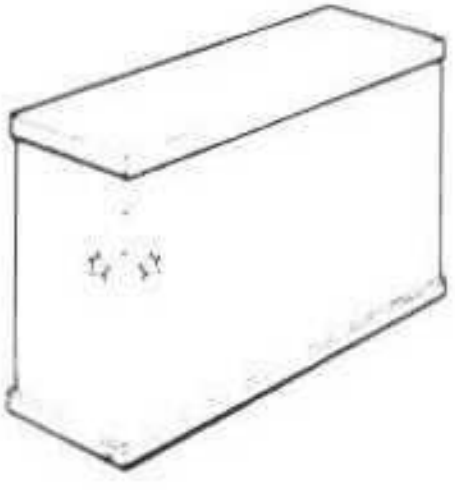

Dealer Action

Repair Eligible Units:

Repair all eligible units including sold units in the field and unsold units in your inventory. Refer to the Repair Procedure section of this bulletin for details.

NOTE

- *Some units in the eligible range have already been repaired by Kawasaki. Repaired units have repair verification labels inside the right hand side cover, a star on the crate below the label, and a punch mark just in front of the engine number on the crankcase.*

SERVICE

SERVICE

Document Completed Repairs:

Federal law requires manufacturers to maintain accurate follow-up records on repairs performed on eligible units. Dealers MUST submit a Warranty Request form for each repair. Refer to the Warranty Information section of this bulletin for details.

Submit Warranty Registration Cards:

Send completed Warranty Registration Cards to Kawasaki immediately after retail sale of any eligible unit. Be sure to supply the correct customer name and address, including ZIP code. Kawasaki uses the information on the Warranty Registration Card for customer recall notification.

Kawasaki Action

Initiate Recall Campaign:

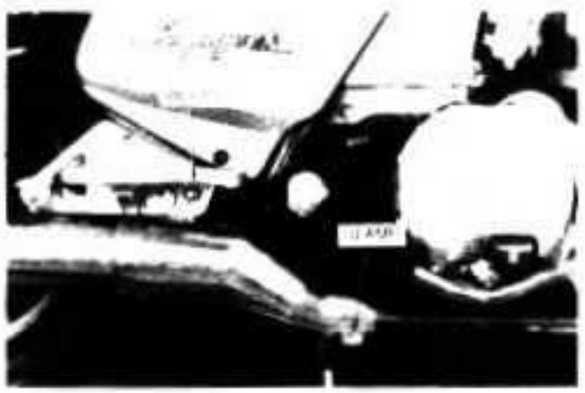

Kawasaki has initiated a recall campaign to repair all eligible units.

Notify Registered Owners:

Kawasaki is sending a recall letter to all registered owners of eligible units. A copy of the letter is printed on the last page of this bulletin.

Repair Procedure

- Support the motorcycle on a suitable stand so that you have access to the underside of the engine.
- Loosen the muffler to exhaust pipe clamps on both sides and the clamp on the exhaust pipe crossover under the engine.
- Take out the bolts holding the muffler brackets to the frame on both sides.

- Pull the muffler assembly to the rear and off the exhaust pipes.
- Remove this screw.

- Take out these three screws, and then remove the fairing lowers on both sides.

- Take out this screw and remove the nut on each side, and then remove the bottom of the fairing.

- Take off the ignition cover.
- Loosen the flange bolt on the top end of the oil pipe to the crankcase.

- Remove the four screws holding the radiator cover to the radiator.

- Very carefully work the radiator cover free of the fairing, and set it aside.

⚠ CAUTION

The paint on the radiator cover is very easy to damage. Be careful not to scratch it during removal.

- Remove the screw holding the radiator to the fairing inner cover on the right side only.

- Take out the two radiator mounting bolts on the right side.

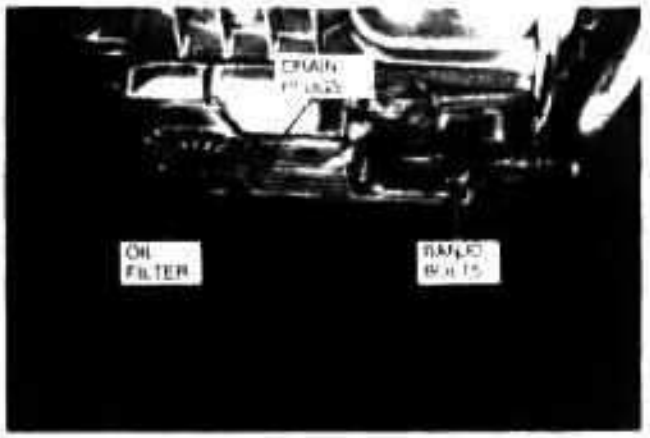

- Pull the right side of the radiator forward and put a 35mm (1-3/8 in.) thick wooden block between the lower right radiator bracket and the mounting bracket on the frame.

- Take off the exhaust pipe holders for the two pipes on the right side.

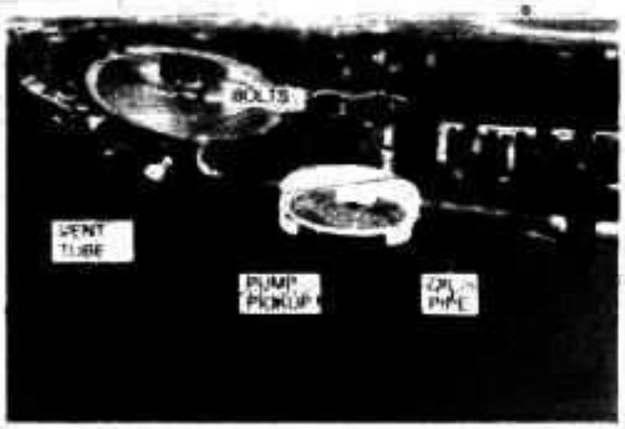

- Rotate the right side exhaust pipes down at the front, and slide them as far to the right as you can. This allows clearance to reach the oil pan bolts.
- Remove the two drain plugs, and drain the engine oil.

- Take out the oil filter.
- Unscrew the two banjo bolts on the oil pipes.

- Take out the oil pan bolts, rotate the oil pipe out of the way, and drop the pan down and out.
- Pull off the oil pump pickup, the oil pipe, and the vent tube.

- Take out the four bolts, and using a wrench on the ignition end of the crankshaft, turn the crank until the drive tang on the oil pump drive gear shaft is vertical. This allows the pump and attached oil filter case to be removed straight down.

NOTE:

o *Use a mirror to see up into the bottom of the crankcase.*

- Clean the four oil filter case mounting bosses on the crankcase with an oil-less solvent.

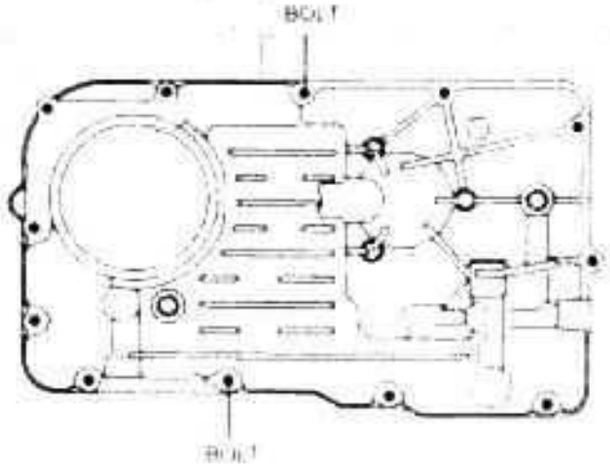

- Place a tiny drop of Three Bond #10 (P/N 56019-120) on the surface of each of the four crankcase bosses.
- Stick the 0.5mm washers into place on the crankcase bosses, with the large diameter washer on the boss with the locating sleeve.
- Be sure the oil passages and O-rings are in place on the oil filter case, and push it back into place in the crankcase.
- Install the four mounting bolts and tighten them to the specified torque.
- Install the parts removed in the reverse order of disassembly. The torque specifications are listed here for your convenience.

Torque Specifications

Fastener	Torque
Oil Filter Case Bolts	1.2 kg-m (104 in-lb)
Engine Drain Plugs	3.0 kg-m (22 ft-lb)
Oil Filter Mounting Bolt	2.0 kg-m (14.5 ft-lb)
Oil Pipe Banjo Bolts	2.5 kg-m (18 ft-lb)

- Replace these two oil pan bolts with new ones from the kit. These bolts are supplied with a non-permanent locking agent already applied.

Repair Verification

- Place the repair verification label on the inside of the R.H. side cover.
- To get more labels, call the Product Support Hot Line.
- Put a punch mark in front of the engine number on the crankcase.

NOTE:

- *Repair verification is an essential part of the repair procedure.*
- *One purpose for the repair verification label is to ensure that those products not yet repaired can be identified and repaired. Not only does this increase customer satisfaction but it also maximizes the success of this recall. Another purpose for the repair verification label is to prevent the wasted time and effort of duplicate repairs.*
