YAMAHA

FOREWORD

This Parts List relates to the parts in use for the Yamaha AS3. When you are ordering replacement parts for the AS3, refer to this Parts List and quote both part numbers and part names correctly.

1. Structure of Part No.

Yamaha parts are divided largely into two categories; general parts and standard parts, and each part No. has the following structure:

Note: Every standard No. begins with 9.

2. How to Use this Parts List

(1) Except for steel balls (whose size is indicated in inches), the size of all parts is indicated in millimeters in the following manner.

Pipe (rubber or vinyl) ..... Inside diameter - length

O-ring ..... Sectional area - inside diameter

Washer, shim, collar ..... Inside diameter - outside diameter - thickness (length)

(2) Parts, which are to be supplied in the form of assemblies, are listed with an indention of one letter's space, and a dot (.) is put

against the name of each part. If any two different assemblies (e.g., right and left side components) consist of almost the same type components, these two assemblies are listed in two lines, and then the names of component parts are listed in the subsequent lines with an indention as mentioned earlier. The quantity of parts is given in the following manner; that is, in the case of parts being the same in type between the right and left, a total quantity of parts is given. On the other hand, if the right and left side parts are different in type, the quantity of part(s) on each side is given.

V ..... Voltage for light bulbs

S ..... "S" type oil seal or "S" type circlip

SD ..... "SD" type oil seal

SO ..... "SO" type oil seal

SW ..... "SW" type oil seal
