1987 EMISSION-CONTROLLED MODELS

HIGH ALTITUDE EMISSION ADJUSTMENTS

INTRODUCTION

To comply with federal emissions regulations, Yamaha is publishing the information in this bulletin. We are also providing high altitude emission information kits to Yamaha dealers. These information kits contain an emission information sticker. They also contain instructions for changing to the optional carburetor main jets on those applicable machines consistently operated at altitudes of 4,000 feet and higher above sea level.

Five high altitude information kits for each applicable model are included with this bulletin. Additional kits can be ordered from YPDI at no charge.

DEALER ACTION SUMMARY

Optional high altitude carburetor main jets must be installed only on units which will always be operated at 4,000 feet or above. Use the instructions provided with the high altitude information kits for proper main jet installation procedures.

NOTE: Main Jets listed in the information kits must be ordered from YPDI.

WARRANTY INFORMATION

Because installation of parts for high altitude operation is a customer option, there is no warranty consideration.

ADJUSTMENT RECOMMENDATION CHART

CAUTION: Once a high altitude main jet has been installed, the unit should not be operated in altitudes below 4,000 feet or serious engine damage could occur. Make sure owners of modified machines are aware of this limitation.
